EXPERIENCE

Frontend Developer
Webcast Technologies Inc.
January 2021 – Present

- Developing and maintaining a tracking system that helps companies monitor their shipments.
- Using React, GraphQL, Material UI, Apollo Client, GIT, HTML & CSS.
- In charge of the deployment of projects on our server.
- Creating reusable components and hooks based on the needs of the project.
- Developed an **Onboarding** component (a system tour guide) that will help our users understand the important functions in our system.
    - Uses Controlled props, Render props, Prop Collection and Provider Pattern
- Developed a **Module Tree** component that shows a list of the system's modules.
    - Uses Recursion method to resolve our problem in displaying infinite level of accessibility.
    - Uses Controlled props and State initializer pattern.
- Created a reusable **Upload** component that can support any module that calls it from within or outside of the system.
    - Implemented render props pattern.

I hereby declare that the above information is correct to the best of my knowledge and belief.
