

JOEBERT SEMBRERO

SENIOR FULL STACK DEVELOPER

(+63) 920 533 2770 | jbrt.dev@gmail.com | Metro Manila, PH | jbrtsmbrr.vercel.app

PROFILE SUMMARY

A Software Developer with 5+ years of experience in web development, specializing in JavaScript, TypeScript, React and Node.js. Skilled in building scalable applications using REST and GraphQL APIs, with a strong foundation in Clean Architecture and Design Patterns, ensuring code maintainability and efficiency.

TECHNICAL SKILLS

FRONTEND SKILLS TypeScript, JavaScript, HTML & CSS, React, Material UI, Shadcn, Tailwind, Zustand, Apollo Client, GraphQL

BACKEND SKILLS TypeScript, Node JS, MySQL, Apollo Server, Express, GraphQL, RabbitMQ, Redis, MongoDB, Docker, SocketIO

WORK EXPERIENCE

SENIOR JAVASCRIPT DEVELOPER

Metropolitan Bank & Trust Company (Metrobank) Sept 2025 – present

Metrobank - Account Activation

- I worked on the development of an Account Activation solution that allows customers to conveniently activate their newly opened bank accounts through digital channels. As part of the development team, I contributed to building and improving the system to provide a fast, secure, and reliable activation process while ensuring customer information and account details are properly validated and handled. The project helps simplify the activation process, allowing customers to access their banking services with greater convenience.

Metrobank – Account Opening

- I worked on the development of an Account Opening solution that enables customers to conveniently apply for and open a bank account through digital channels without the need to visit a branch. As part of the development team, I contributed to building and improving the system to provide a fast, secure, and reliable account-opening experience while ensuring customer information is accurately processed and securely handled. The project helps streamline the account-opening process, making banking more accessible and convenient for customers.

Metrobank – Online Customer Updating

- I worked on the development of Online Customer Updating, a digital solution that allows customers to conveniently update their personal information without the need to visit a bank branch. As part of the development team, I contributed to building and improving the system to ensure a fast, secure, and reliable experience while maintaining the accuracy and integrity of customer information. The project helps streamline the customer updating process by making it more accessible and convenient through digital channels.

SENIOR FULL STACK DEVELOPER

Webcast Technologies Inc. Jan 2024 – Sept 2025

- Leading a development team in building an application that stores, analyzes, and interprets geospatial data, empowering clients with location intelligence to drive informed business decisions and generate valuable insights. The tech stack includes React, TypeScript, NodeJS, GraphQL, Shadcn, Tailwind, Google Maps API, Apollo Client & Server, Git, Zustand, HTML, and CSS.
- Responsible for onboarding newly hired developers.
- Coordinates with different teams to streamline deployment activities.
- Contributes to design discussions to provide technical insights and feedback for optimal implementation.
- Ensures compatibility of new code with existing systems during the review process.

FRONTEND DEVELOPER

Webcast Technologies Inc. Jan 2021 – Jan 2024

- Developing and maintaining a tracking system that helps companies monitor their shipments. The tech stack includes React, GraphQL, Material UI, Apollo Client, GIT, HTML and CSS.
- In charge of the deployment of projects on our server.
- Creating reusable components and hooks based on the needs of the project.
- Developed an **Onboarding** component (a system tour guide) that will help our users understand the important functions in our system.
 - Uses Controlled props, Render props, Prop Collection and Provider Pattern.
- Developed a **Module Tree** component that shows a list of the system's modules.
 - Uses Recursion method to resolve our problem in displaying infinite level of accessibility.
 - Uses Controlled props and State initializer pattern.
- Created a reusable **Upload** component that can support any module that calls it from within or outside of the system.
 - Implemented render props pattern.

AWARDS / CERTIFICATIONS

Certificate of Completion – Google Maps Platform API

Certificate of Completion – Advanced React Component Patterns

Certificate of Recognition – Best Trainee Computer Hardware Servicing – Batch 1

Certificate of Recognition – Best Thesis presented in the CSD IT Convention 2019

Certificate of Completion – Philippine Fisheries Development Authority (PFDA)

EDUCATIONAL BACKGROUND

University of Caloocan City

Bachelor of Science in Information Technology

2015 – 2019

TESDA – Computer Hardware Servicing
Caloocan City Manpower Training Center
2015

Secondary Education

Tala High School
2010 – 2014

Primary Education

Star Elementary School – Unit 1
2004 – 2010
